# Creating a new future for food packaging

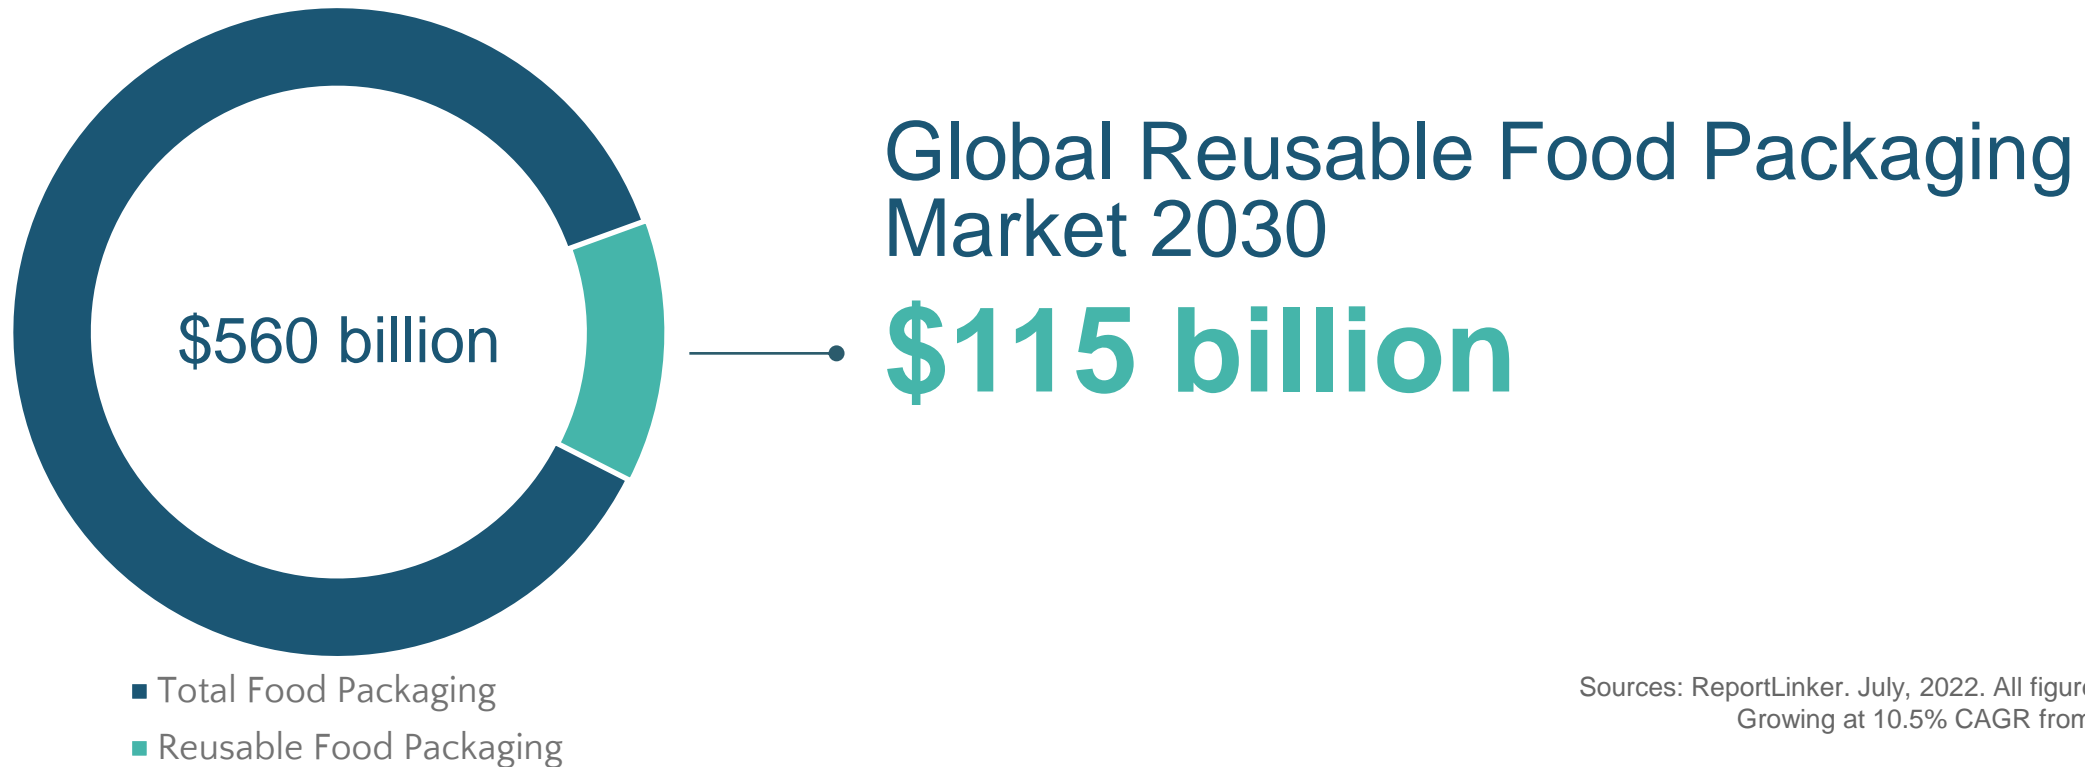

---

- ✓ Reusables as a Service platform for food businesses & consumers
- ✓ In revenue with top tier commercial and enterprise clients
- ✓ Sales distribution & operational partnerships with enterprise food service operators and food delivery platforms

# Reusable packaging is inevitable

Experts have proven that reusable food packaging is the most sustainable form of packaging at scale. The penetration of reusable packaging is expected to grow rapidly.

Sources: ReportLinker. July, 2022. All figures are in USD. Growing at 10.5% CAGR from 2019 – 2027.

# We make reuse seamless.

Digital infrastructure for the circular economy.

Enabling businesses to track reusable packaging and their sustainable impact.  
Rewarding consumers for reusing.

## TRUSTED BY

# Path to reuse by default

---

## Infrastructure

- Current infrastructure needs to be retrofitted to optimize for reuse.
- Municipalities are best positioned to provide shared cleaning facilities.

## Experience

- Seamless user experience (consumer & business) is key for transition.
- Deposits present financial and psychological barriers to high return rates.

## Systems Change

- Material choice is a key consideration.
- Tracking and measurement is crucial to achieving circularity.

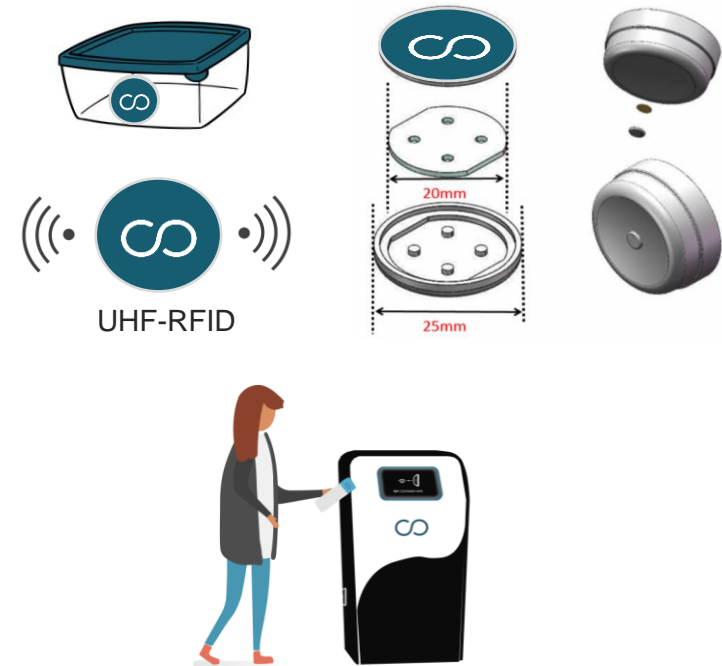

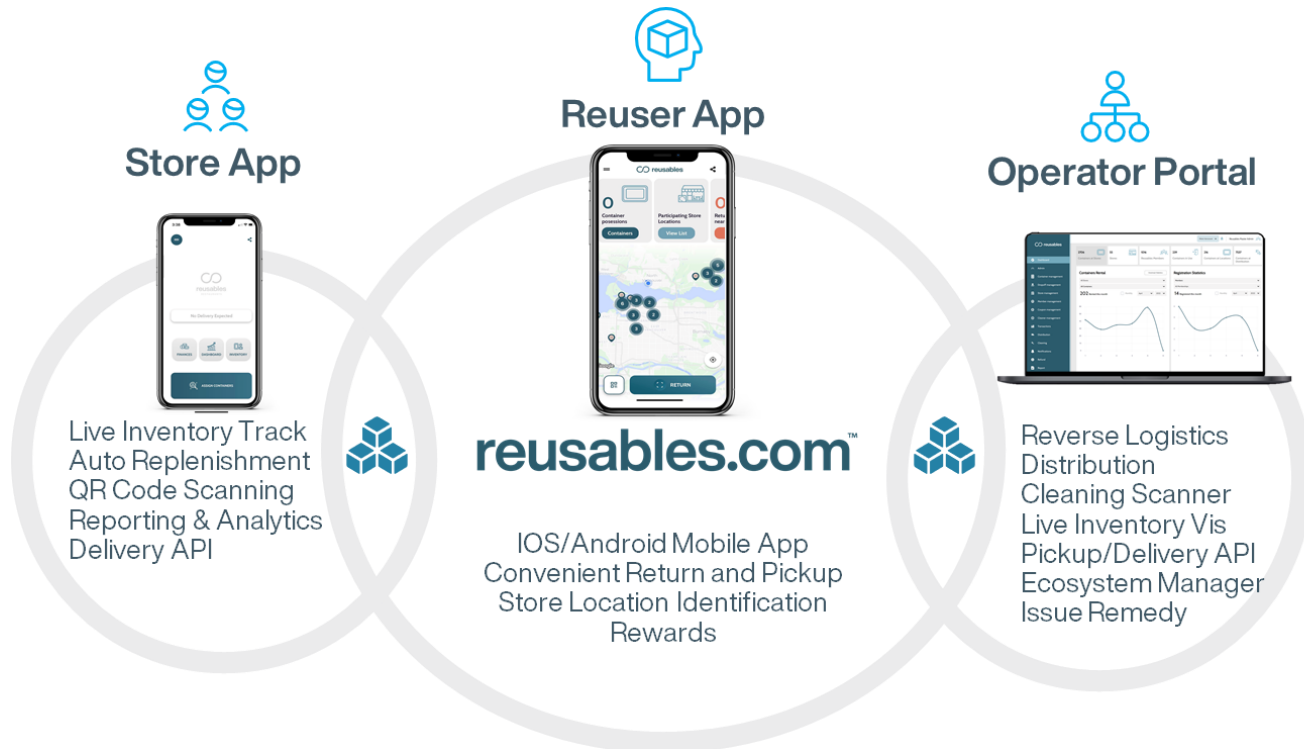

# Our Technology

Scalable software and patent-pending IoT technology to track any kind of packaging, anywhere.

## Reusables Management System (RMS)

+

## IoT Tracking Tags & Smart Return Bins

# Tap to Reuse Experience

Our patent-pending tracking technology simplifies borrow and return experience.

# Reusables are vessels for data

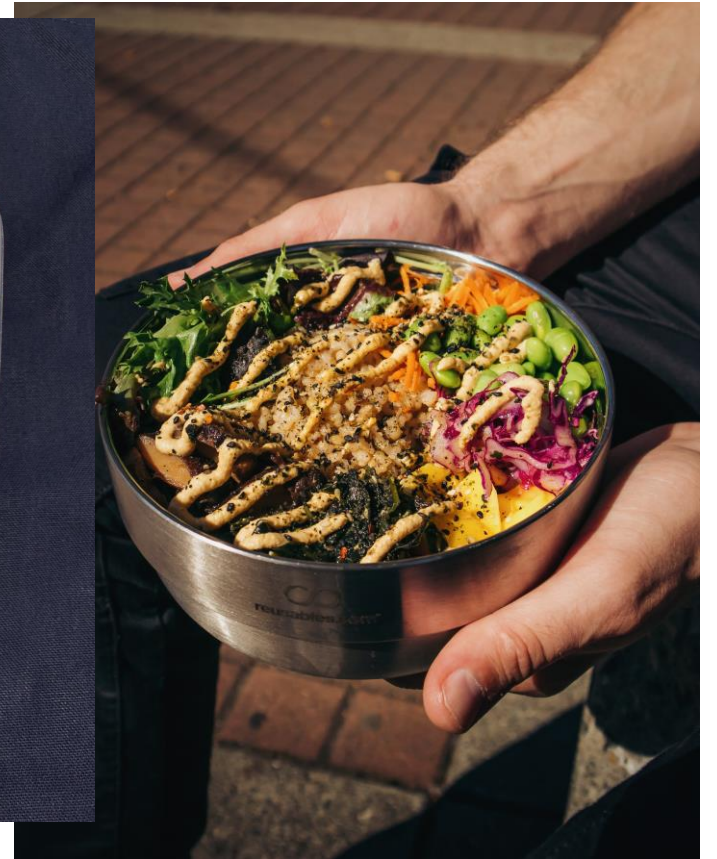

---

Capturing valuable data on consumer usage, CO2 emissions and packaging waste diversion.

# Reusables in action

# Experienced team in start-up, scaling and exit.

Deep industry experience in enterprise technology with 5 combined exits.
